

**DIGITAL  
INTERLOCK  
SOFTWARE**  
CONNECT THROUGH CONTENT

# Introduction

- Software company formed in 2014, with a vision to transform the traditional POS landscape of the UK On-Trade.
- Patent granted in 2020, covering all digital screens on the bar top, where content displayed is managed remotely via a wireless connection.
- June 2020, we embarked on a project to create a digital screen that was fit for purpose for the UK On-Trade.

## DIGITAL RETRO FIT CIRCULAR SCREENS

IPS LCD HD screen for  
impactful content

86mm screen size helps increase  
on-site customer engagement

The HD screen assists  
with crystal clear  
content – so clear, you  
can scan a QR code off  
of it, using your mobile  
phone.

# DIS-Lens

## RETROFIT DESIGN

Will fit most existing trade  
equipment

Little or no modification required

Uses a unique system to anchor the lens to the font securely, ensuring that it's extremely hard to remove without the proper tools, or damaging the unit.

Fits directly into a standard Lens POD, and uses the power supply for the LED board, which plugs directly into the underbar Transformer

This system ensures that if you need to remove and convert back to a standard acrylic lens, that no damage is done to the pod or font.

# DIS-Lens

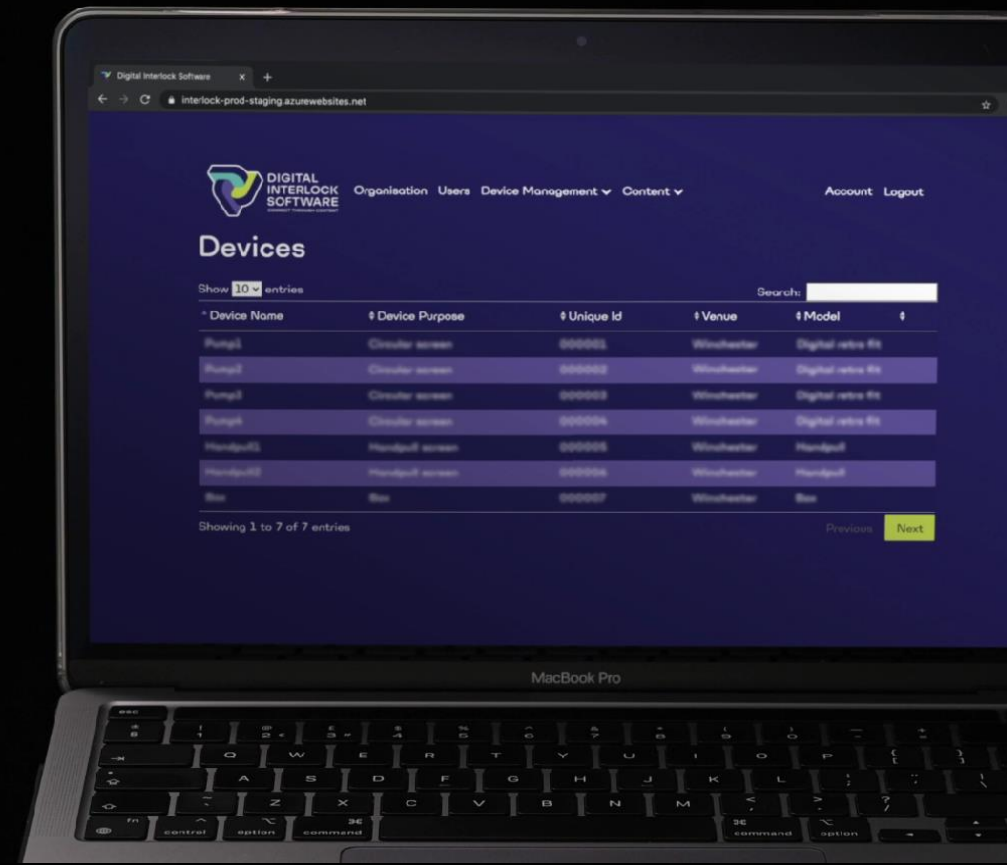

Our secure site, along with role specific access levels, means that only authorised personnel can register devices and publish content

## REMOTELY MANAGE CONTENT

Update your content from anywhere via Wi-Fi

Connect to the DIS online portal for quick content change

Enables messages to be displayed at the right time and place

# DIS-Lens

## ILLUMINATED SIDE BRANDING

Multiple colour changing  
functions

Creates focal point at PoS

Attention grabbing from  
multiple angles

The smart LEDs allow you to set the colour to your specific brand, illuminating the background. The LED's can also be programmed to follow a specific pattern, creating movement, to disrupt consumer behaviour.
